## Quick Strip Baby Quilt

Approx size $30^{\prime \prime}$ by $40^{\prime \prime}(75 \mathrm{~cm} \times 1 \mathrm{~m})$
By Anita Birtles

## Requirements

- 1 Metre backing fabric
- 50 cm binding fabric or use scrappy binding
- 1 Metre Wadding
- Jelly Roll $2 \frac{1}{2}$ inch strips ( 11 strips for $1 \mathrm{~m} \times 75 \mathrm{~cm}$ quilt)
- $3 x 75 \mathrm{~cm}$ lengths of till roll scrap edging
- 20 cm fabric for applique strip
- $3 \times 15 \times 20 \mathrm{~cm}$ square for elephant applique or use scraps to make these squares
- 20 cm heat and bond

## Workshop notes

Making scrap till roll edging before you start the quilt will save time. Notes for making this are available separately and are a great way to use up your scraps. If you want your applique to be scrappy make 3 x 20 cm squares to use for the elephants. This is an ideal way to use scraps to make a beautiful quilt.

## Suggested method

You will need to cut 3 till roll scrap edging strips to $30^{\prime \prime}(75 \mathrm{~cm})$ long plus $112 \frac{1}{2} /{ }^{\prime \prime}$ jelly roll strips cut to $30^{\prime \prime}$ $(75 \mathrm{~cm})$ and 1 applique background strip $8^{\prime}(20 \mathrm{~cm})$ wide $\times 30^{\prime \prime}(75 \mathrm{~cm})$ long. Place them in your preferred order according to the plan overleaf or use your own combination.

## Layout

| Row 1 | $21 / 2^{\prime \prime}$ strip $\times 30 \prime$ ( 75 cm ) long |
| :---: | :---: |
| Row 2 | Till roll scrap edging $3^{\prime \prime} \times 30^{\prime \prime}(75 \mathrm{~cm})$ long |
| Rows 3-6 | 21/2" strip $\times 30 \prime$ ( 75 cm ) long |
| Row 7 | Till roll scrap edging $3^{\prime \prime} \times 30^{\prime \prime}(75 \mathrm{~cm})$ long |
| Rows 8-10 | $21 / 2^{\prime \prime}$ strip $\times 301$ ( 75 cm ) long |
| Row 11 | $8^{\prime \prime}(20 \mathrm{~cm})$ Appliqué base strip |
| Rows 12-13 | $21 / 2^{\prime \prime}$ strip $\times 30 \prime$ ( 75 cm ) long |
| Row 14 | Till roll scrap edging $3^{\prime \prime} \times 30^{\prime \prime}(75 \mathrm{~cm})$ long |
| Row 15 | $21 / 2^{\prime \prime}$ strip $\times 30 \prime$ ( 75 cm ) long |

Sew the $2 \frac{1}{2 \prime \prime}$ and till roll strips together in pairs until you have strips 1-10 sewn together and strips 12-15 sewn together. Leave the applique strip until after you have sewn on your elephants.

For each elephant you will need a square $6^{\prime \prime} \times 8^{\prime \prime}(15 \times 20 \mathrm{~cm})$ these can be made up of scraps, strips or single fabrics. Trace the elephant onto a sheet of heat and bond, cut out roughly and apply using an iron to the wrong side of your fabric square. Cut around the edge of the elephant, remove the paper and place on the right side of your strip and press. Use a blanket or satin stitch to secure to the fabric.

Sew this (row 11) to row 10 and 12 and the top of your quilt is complete.
Cut your backing fabric $110 \mathrm{~cm} \times 85 \mathrm{~cm}$ and layer up with wadding and the quilt top. For this quilt I used a machine tying method.

Machine tying is simple to do - set your machine to a satin stitch and sew approx. $1 / 4^{\prime \prime}$ of satin stitch. These will look like dots so you can either do a contrast or matching thread. Go along the rows about 1015 cm apart and sew a dot. Once the quilt sandwich is secure then you can bind using your usual method.
